Experience, Above All™

**ARMSTRONG CEILING SOLUTIONS TO INCREASE PRICE OF SUSPENSION SYSTEMS AND
MANAGE INVENTORY**

Geographic Coverage: United States, Canada and Latin America
Commercial Distributors, Contractors and Retailers

LANCASTER, PA – Effective March 24, 2025, Armstrong Ceiling Solutions will initiate an increase of 15.0% on the list price of all acoustical and drywall suspension systems.

This increase is driven primarily by raw material inflation, which continues to remain unstable with respect to several core inputs including steel along with increased fabrication costs, industry capacity constraints and anticipated extended lead times.

This Pricing Bulletin is based on current available information and reflects conditions at this time. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price and contract at whatever pricing you may choose in your discretion.

Effective March 1, a managed inventory program designed to ensure continued service levels will be implemented throughout all regions, with program details and procedures to be provided through authorized sales representatives. Please always feel free to contact your local area manager with any questions or requests for assistance.

We will continue to focus on delivering innovative high-quality products and world class service to our valued customers, and the ceilings and wall solutions they value.

As always, we appreciate and thank you for your business.
