**ARMSTRONG ARCHITECTURAL SPECIALTIES ANNOUNCES A PRICE INCREASE ON
METAL CEILINGS & WALLS SYSTEMS PRODUCTS**

Geographic Coverage: United States, Canada and Latin America
Commercial Distributors and Contractors

LANCASTER, PA – Effective Monday, March 24, 2025, Armstrong Architectural Specialties will implement a 7% increase on all Metal-based products, including MetalWorks, Suspension, Hanging Kits, Trim, Clips, and other Metal Accessories.

The last price increase on Metal-based Architectural Specialties products occurred in February 2024. Since then, costs have increased for steel and aluminum and additional inflation in those materials is anticipated. Despite diligent efforts to navigate these inflationary conditions, a price increase is now necessary to offset these rising costs.

Armstrong will continue to monitor these volatile market conditions and will communicate additional changes as needed

Please note the escalation table on all custom and premium quotations will apply.

For longer-term future quotes, we suggest the following pricing for 2025/2026:

- An additional increase of 5% for quotes on or after July 24, 2025
- Another additional increase of 5% for quotes on or after September 24, 2025

This Pricing Bulletin and the above guidance are based on current available information and conditions. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price and contract at whatever pricing you may choose in your discretion. Please always feel free to contact your local area manager with any questions or requests for assistance.

As always, we appreciate and thank you for your business.

Jill Crager
SVP, Sales Operations
